

Aberdeen Creek Approved Colors Exterior House Paint

Claire Martinez provided me with two copies of “Color Selections for Inland Homes” catalogs based on the Duron Exterior Paints. Each catalog consists of pages showing the approved color selections for Aberdeen Creek exterior paint. Paint chip examples are provided on each page of the books and are labeled with their name and the equivalent Sherwin Williams paint number, e.g. SW7006.

It is my understanding that Claire had created these books with the assistance of Doug Wandell, the Branch Operations Manager at the Sherwin Williams Company store located at 7221 US Hwy 301 South, Riverview, FL 33569. Sherwin Williams had acquired Duron shortly after the Aberdeen Creek development had been started and Claire has updated them with any additional approvals made by the Architectural Committee. Therefore, the books and the listings provided in them should represent an up-to-date reference for all the approved ACHOA colors.

Color Selection Book Format

The book pages provide information in one of two formats:

- Scheme
- Door Colors

Scheme Pages

All Scheme Pages show the approved Main Body and Trim Exterior Colors and there are 43 different approved schemes in the Color Book. In all cases Scheme Pages provide Main Body and Trim color requirements, while 9 of the Scheme Pages also include Door Color requirements. However, 34 of the existing Scheme Pages **DO NOT** specify Door Colors as part of their information.

Door Colors

The Color Book also contains a listing of 20 approved Exterior Paint Door Colors. While 8 of them are shown on Scheme Pages, the remaining 12 are simply listed as approved colors.

Color Selection Book Listing

The following tables summarize all the Color Chip information provided in the ACHOA Color Book. This listing was created on 5/8/2013.

Aberdeen Creek Approved Colors Exterior House Paint

Aberdeen Creek Approved Color Schemes
